

BASEL Microfluidics Events 2017

Basel, Switzerland, 11 – 13 September 2017

On the occasion of the **Basel Life 2017** (formerly known as Basel Life Science Week including MipTec and EMBO), two events dedicated to **Microfluidics** will take place in Basel on September 11th and 12th, followed by a company visit on September 13th.

These events will be organized by **BaselArea.swiss** (Switzerland) together with their networking partners **MinacNed/FHI** (Netherlands) and **microTEC Südwest** (Germany).

The goal of these events is to create a platform of international companies and institutes, with a strong **focus on R&D in Life Sciences and Pharmacy**. The Basel region is known as the Swiss **pharma hub** with over 25.000 employees. Besides the big companies as Roche and Novartis, there are hundreds of small and medium sized companies specialized in research and development for the pharmaceutical industry.

Program:

11.09.17 Basel Microfluidics Workshop 2017

Keynote presentation given by **Prof. Sabeth Verpoorte** (University of Groningen).

Technology and application related sessions are the backbone of the program:

micro & nano manufacturing, lab automation & instrumentation, drug development & delivery.

More than 300 delegates registered to the respective event in 2016.

More information about the workshop may be accessed here:

<https://www.basellife.org/basel-microfluidics>

12.09.17 Basel Microfluidics Matchmaking & Networking Event 2017

Keynote presentation given by leading academic and industrial speakers in the field, e.g. **Prof. Andrew deMello** (ETH Zurich).

More information about the event and registration may be accessed here:

13.09.17 Company visits to IBM Zurich (research group “Precision Diagnostics” of Prof. Emmanuelle Delamarche) and **Mettler Toledo** - In preparation

Looking forward to see you in Basel!
